ANJI CONNELL TALKS US THROUGH SOME OF OUTDOOR FURNITURE SPECIALIST KETTAL'S RANGE OF EXTERIOR DECORATION AND DESIGN PRODUCTS

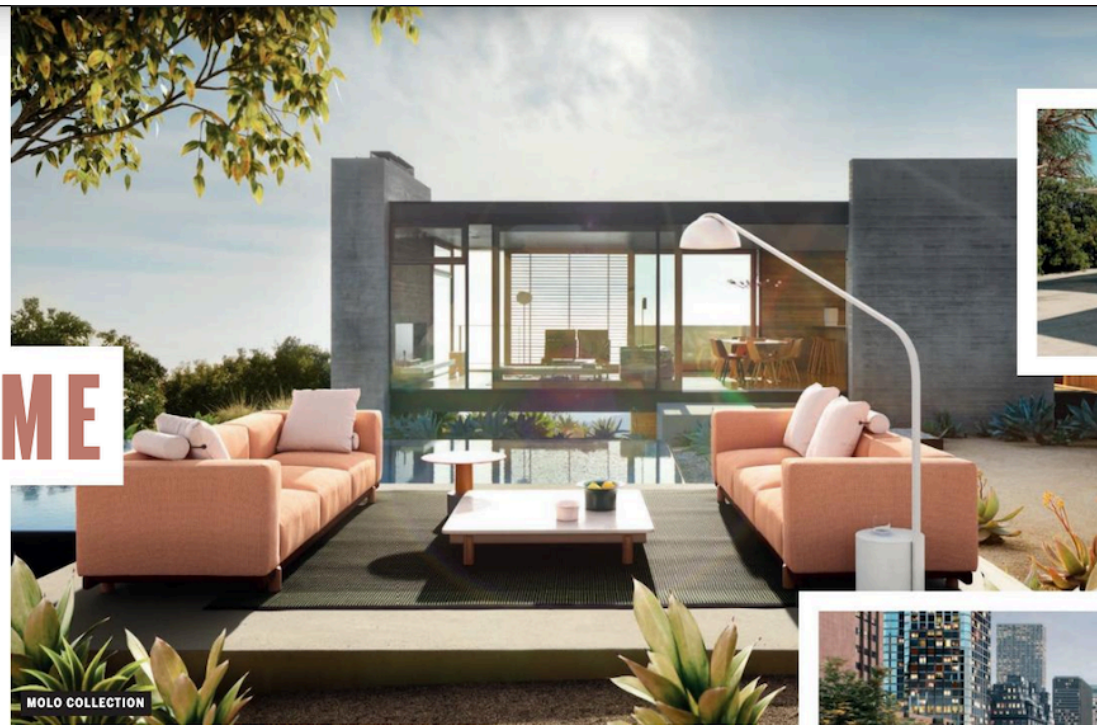

The recent lockdown has caused a surge in the number of people looking to upgrade their garden, as they finally have the time to enjoy and work on the space. With summer well and truly upon us, and the usual holidays a no-go, Kettal's timeless pieces offer the perfect backdrop to a heavenly back-garden summer.

Cooking outdoors

Its sleek new outdoor kitchen has a beautiful simplicity to its metal structure that is made from aluminium in a choice of 30 gorgeous colours. Doors come in a choice of Ceppo di Gré stone, white marble, teak, and aluminium, while the worktops are available in teak wood or in one of three colours of Ceppo di Gré stone. All slide over completely as protection from the weather. Available as either a wall unit or an island. Both models work independently as they have an integral water heater, storage for kitchen utensils, and a choice of a ceramic hob, barbecue, fridge, and a wine cabinet. The water and electric fittings attach to the bottom of the island unit and to the back on the wall unit. A matching trolley and a sideboard unit double up as support tables and an additional work surface.

Mood lighting

The new LED Dots Collection of outdoor lights mimics sleek interior lighting and lends a contemporary feel to the outdoors. They look fantastic as part of a furniture grouping, as well as when used to denote walkways and level changes. Manufactured in aluminium, they are

MOLO COLLECTION

available as a floor lamp with a circular base that can be fixed or freestanding, and as a lamp with a planter base. The light highlights the plant and its surroundings. Its heights can be adjusted, and the light head is directional. Both come in 30 aluminium colour options.

The Half Dommelight is reminiscent of the iconic and classic indoor Arco floor standing light by Flos and really conveys a 'living room feel' to the outdoors. It comes in two versions and 34 aluminium colours.

FILA

The Fila lamp collection can be used as both a floor lamp and a table lamp. A simple aluminium frame has a fitted fabric lampshade over it that completely transforms when lit by casting ethereal shadows on the walls and surrounds. Doshi Levien's fabric 'Parallels' covers the frame, and the lamps are available in three sizes and seven colours. Combining different sizes and colours in groups looks very sculptural. Cleverly, they are also available for use with batteries, so they can be moved around as and where you need them.

Comfort

The Molo Collection by Rodolfo Dordoni is an intentionally oversized modular sofa system manufactured in aluminium, teak, concrete and Terrain Fabrics. It is easily adapted to suit any space. The collection comprises sofas, a deck chair, and a centre table. The Doshi Levien designed rugs explore the interplay of different geometries artistically, while aesthetically they transform and unite the furniture pieces into groups that replicate indoor living. Both the Block and Line rugs are two by three metres, and three by four metres.

METEO

Shelter

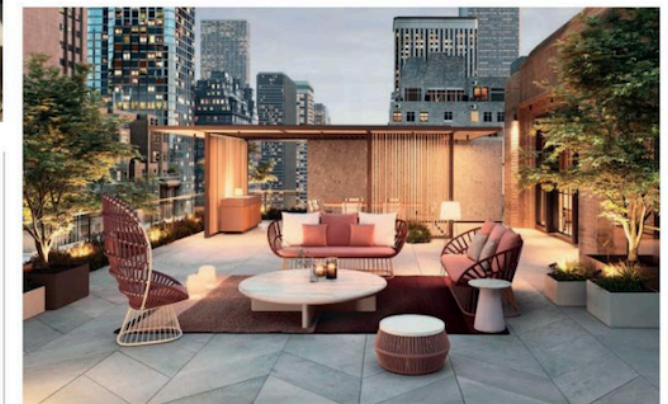

All of the above stand alone but work superbly with the new Kettal VDL Pavilion, which is a collaboration between Kettal and Dion Neutra. Although the materials for the VDL Pavilion have been updated, they have also meticulously reproduced the original and iconic details of the modernist architect Richard Neutra and

METEO

ZIGZAG

his son Dion Neutra's VDL11 research house and home.

Kettal Pavilions add structure with functionality, providing shelter through cooling shade and protection from the rain and wind. The pavilions can be fully open or closed in inclement weather and when not in use. The sides come in a choice of louvers or electric mini louvers, while all come with a ceramic floor and a ceiling skylight, and the integral electrical system is controlled via an app.

Kettal Meteo is a sleek and stylish modern telescopic parasol. A basic model uses a manual pulley system, and a high-end model uses an integrated gas piston. The base plates come in sheet metal or iron casing and Kettal's own range of sunshade material. It also comes with a planter.

Add to this a Kettal Zig Zag multi-functional ceramic coffee topped table that easily turns into a fire or a barbecue. Finish it all off with planter and stools, that are available in small, medium, and large, et voilà, you are all set for a super stay home, stay safe summer.

ABOUT ANJI CONNELL

Internationally recognised interior architect and landscape designer, Anji Connell, is a detail-obsessed Inchbald graduate, and has been collaborating with artisans and craftsmen to create bespoke and unique interiors for a discerning clientele since 1986. Anji is a stylist, feature writer and lover of all things art and design. www.anjiconnellinteriordesign.com
